Note: The category codes listed in Table 2B include all the related 4- and 5-digit codes. "ICD-9-CM Official Guidelines for Coding and Reporting" dictate the following:  
 A three-digit code is to be used only if it is not further sub-divided.  
 Where fourth-digit subcategories and/or fifth-digit sub-classifications are provided, they must be assigned.  
 A code is invalid if it has not been coded to the full number of digits required for that code.  
 Codes with three digits are included in ICD-9-CM as the heading of a category of codes that may be further subdivided by the use of fourth and/or fifth digits, which provide greater detail.  
 Manifestation codes are required by "M". ICD-9-CM guidelines pertaining to multiple coding and sequencing of diagnosis codes apply to OASIS diagnosis items.
